

## URGENT PRELIMINARY REPORT OF YELLOW CARD DATA ON VACCINES ADVERSE EVENTS REPORTED IN THE UK

### CONCLUSION:

"An immediate halt to the vaccination programme is required whilst a full and independent safety analysis is undertaken to investigate the full extent of the harms."

Dr Tess Lawrie

"I would, therefore, like to draw your attention to the high number of covid-19 vaccine-attributed deaths and ADRs that have been reported via the Yellow Card system between the 4th January 2021 and the 26th May 2021.

In total, 1,253 deaths and 888,196 ADRs (256,224 individual reports) were reported during this period.

The nature and variety of ADRs reported to the Yellow Card System are consistent with the potential pathologies described in this paper and supported by other recent scientific papers on vaccine-induced harms, which are mediated through the vaccine spike protein product (2,3). It is now apparent that these products in the blood stream are toxic to humans."

Tess (MBBCh, DFRSH, PhD), as director of E-BMC Ltd, is committed to improving the quality of healthcare through rigorous research. Her range of research expertise, based on research experience in both developing and developed countries, uniquely positions her to evaluate and design research for a variety of healthcare settings. Tess is a frequent member of technical teams responsible for developing international guidelines. Her peer-reviewed publications have received in excess of 3000 citations and her ResearchGate score is among the top 5% of ResearchGate members. This report is supported by EbMC Squared CIC.

The MHRA now has more than enough evidence on the Yellow Card system to declare the COVID-19 vaccines unsafe for use in humans. Preparation should be made to scale up humanitarian efforts to assist those harmed by the COVID-19 vaccines and to anticipate and ameliorate medium to longer term effects. As the mechanism for harms from the vaccines appears to be similar to COVID-19 itself, this includes engaging with numerous international doctors and scientists with expertise in successfully treating COVID-19.
